DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 - 13, drawn to computer-to-computer data transfer regulating, classified in class 709, subclass 232.
 - II. Claim 14, drawn to accessing a remote server, classified in class 709, subclass 219.
 - III. Claim 17, drawn to round robin, classified in class 710, subclass 111.
 - IV. Claims 20 - 26, drawn to entry replacement strategy of data, classified in class 711, subclass 133.
 - V. Claims 27 - 30, drawn to computer-to-computer direct memory accessing, classified in class 709, subclass 212.

1. The inventions are distinct, each from the other because of the following reasons:
2. Inventions I – V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as accessing a remote server, round robin, entry replacement strategy of data, computer-to-computer direct memory accessing, particulars.
3. Invention II has separate utility such as round robin, entry replacement strategy of data, computer-to-computer direct memory accessing, particulars.

Art Unit: 2143

4. Invention III has separate utility such as entry replacement strategy of data, computer-to-computer direct memory accessing, particulars.

5. Invention IV has separate utility such as computer-to-computer direct memory accessing, particulars.

6. See MPEP § 806.05(d).

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

8. Because these inventions are distinct for the reasons given above and the search required for one group is not required for other groups, restriction for examination purposes as indicated is proper.

9. A telephone call was made to attorney Gregory Murgia on June 13, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 2143

11. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David E. England whose telephone number is 703-305-5333.
